SOIL BIOLOGY AND BIOCHEMISTRY

Cooperating Journal of the International Union of Soil Sciences

AIMS AND SCOPE

AIMS

Soil Biology & Biochemistry is intended to act as an organ of research on soil organisms, their biochemical activities and their influence on the soil environment and plant growth. It publishes original work on quantitative, analytical and experimental aspects of such research. Soil biology and soil biochemistry cover many scientific disciplines but a single journal brings together the results and views of research workers working in a wide variety of research areas.

SCOPE

The scope of this journal is wide and embraces accounts of original research on the biology, ecology and biochemical activities of all forms of life that exist in the soil environment. In the context of the soil environment, subjects which have proved to be prominent or are receiving increasing attention include:

microbial biomass and soil fertility
soil organisms and sustainable agriculture
biology of earthworms and other soil animals
biology and biochemistry of decomposition
soil enzymes
mycorrhiza
biological nitrogen fixation
biological nutrient transformations and cycling
modelling of biological processes
biology and biochemistry of contaminated soils
waste disposal
bioremediation
biodegradation of xenobiotics
soil-borne plant pathogens
biological control of organisms
genetically-engineered microorganisms (GEMS) or plants.

Among the criteria for publication are the intrinsic interest and the scientific value of the work described. Authors are encouraged to evaluate both the fundamental and the applied aspects of their topic, and, where possible, to show how they are interrelated.

Original papers, not published previously, are welcomed from all parts of the world. The contributions also include Short Communications concerned with modern experimentation, techniques, equipment and significant observations. Papers are accepted that present a new theory, provide a state-of-the-art review or comment upon some controversial topic area relevant to the journal. Book reviews are published.

EDITOR-IN-CHIEF

PROFESSOR J. S. WAID, P.O. Box 760, Buderim, Queensland 4556, Australia: *Fax* +61 (754) 769 183: *E-mail* jswaid@optusnet.com.au

CHIEF EDITORS

PROFESSOR J. M. ANDERSON, Department of Biological Sciences, University of Exeter, Prince of Wales Road, Exeter EX4 4PS, UK: *Fax* +44 (0) 1392 263700: *E-mail* j.m.anderson@exeter.ac.uk

PROFESSOR R. G. BURNS, Department of Biosciences, University of Kent, Canterbury, Kent CT2 7NJ, UK: *Fax* +44 (0) 1227 763 912: *E-mail* r.g.burns@ukc.ac.uk

PROFESSOR D. C. COLEMAN, Institute of Ecology, Ecology Annex, University of Georgia, Athens, GA 30602-2360, U.S.A.: *Fax* +1 (706) 583 0646: *E-mail* coleman@sparc.ecology.uga.edu

BOARD OF SUBJECT EDITORS

PROFESSOR H. ANTOUN, Université Laval Ste-Foy (Québec), Canada.

DR E. BÅÅTH, Lund University, Lund, Sweden.

DR. G. H. BAKER, CSIRO, Canberra, Australia.

DR R. D. BARDGETT, Lancaster University, Lancaster, UK.

DR T. BOLGER, University College Dublin, Dublin, Ireland.

DR M.-M. COÛTEAUX, Centre d'Ecologie Fonctionnelle et Evolutive, France.

PROFESSOR J. DIGHTON, Rutgers University, Camden, U.S.A.

PROFESSOR R. A. DRIJBER, University of Nebraska-Lincoln, Lincoln, U.S.A.

DR R. P. EVERSHED, University of Bristol, Bristol, UK.

DR A. J. FRANZLUEBBERS, USDA-Agricultural Research Service, Watkinsville, U.S.A.

DR A. GANGE, University of London, Surrey, UK.

PROFESSOR K. E. GILLER, Wageningen University, Wageningen, The Netherlands

DR G. GUGGENBERGER, University of Bayreuth, Bayreuth, Germany.

PROFESSOR T. HATTORI, Sendai, Japan.

PROFESSOR D. W. HOPKINS, University of Stirling, Stirling, UK.

PROFESSOR H. INSAM, Universität Innsbruck, Innsbruck, Austria.

PROFESSOR R. G. JOERGENSEN, University of Kassel, Witzenhausen, Germany.

PROFESSOR M. KIMURA, Nagoya University, Nagoya, Japan.

PROFESSOR I. KOEGEL-KNABNER, TU Munich, Freising-Weihenstephan, Germany.

PROFESSOR S. P. MCGRATH, Rothamsted Experimental Station, Herts, UK.

PROFFESOR A. G. O'DONNELL, University of Newcastle Upon Tyne, Newcastle Upon Tyne, UK.

DR K. RITZ, Scottish Crop Research Institute, Dundee, UK.

DR C. H. ROBINSON, University of London, London, UK.

PROFESSOR DR S. SCHEU, Technische Universitaet Darmstadt, Darmstadt, Germany.

PROFESSOR J. SCHIMEL, University of California, Santa Barbara, U.S.A.

PROFESSOR K. M. SCOW, University of California, Davis, U.S.A.

PROFESSOR T. R. SEASTEDT, University of Colorado, Boulder, U.S.A.

PROFESSOR K. SIVASITHAMPARAM, University of Western Australia, Australia.

DR J. L. SMITH, USDA-ARS, Washington State University, Pullman, U.S.A.

PROFESSOR G. STOTZKY, New York University, New York, U.S.A.

DR G. TIAN, University of Georgia, Athens, U.S.A.

PROFESSOR C. VAN KESSEL, University of California, Davis, U.S.A.

DR S. VISSER, The University of Calgary, Alberta, Canada

PROFESSOR D. A. WARDLE, University of Sheffield, Sheffield, UK.

PROFESSOR J. C. ZAK, Texas Tech. University, Lubbock, U.S.A.

CONTENTS

Volume 33 Number 1

G. Wen, R. Paul Voroney, J. J. Schoenau, T. Yamamoto and **J. Chikushi**	1	Assessment of ionic quenching on soil ATP bioluminescence reaction
A. Westphal and **J. O. Becker**	9	Components of soil suppressiveness against *Heterodera schachtii*
V. Acosta-Martínez and **M. A. Tabatabai**	17	Arylamidase activity in soils: effect of trace elements and relationships to soil properties and activities of amidohydrolases
J. V. Gagliardi, J. S. Buyer, J. S. Angle and **E. Russek-Cohen**	25	Structural and functional analysis of whole-soil microbial communities for risk and efficacy testing following microbial inoculation of wheat roots in diverse soils
S. L. Connin, X. Feng and **R. A. Virginia**	41	Isotopic discrimination during long-term decomposition in an arid land ecosystem
C. Nguyen and **A. Guckert**	53	Short-term utilisation of ^{14}C-[U]glucose by soil microorganisms in relation to carbon availability
Y. Kuzyakov, H. Ehrensberger and **K. Stahr**	61	Carbon partitioning and below-ground translocation by *Lolium perenne*
S. L. Trabue, A. V. Ogram and **L.-T. Ou**	75	Dynamics of carbofuran-degrading microbial communities in soil during three successive annual applications of carbofuran
J. A. E. Molina, C. E. Clapp, D. R. Linden, R. R. Allmaras, M. F. Layese, R. H. Dowdy and **H. H. Cheng**	83	Modeling the incorporation of corn (*Zea mays* L.) carbon from roots and rhizodeposition into soil organic matter
M. A. Bradford, P. A. Wookey, P. Ineson and **H. M. Lappin-Scott**	93	Controlling factors and effects of chronic nitrogen and sulphur deposition on methane oxidation in a temperate forest soil
A. Peix, A. A. Rivas-Boyero, P. F. Mateos, C. Rodriguez-Barrueco, E. Martínez-Molina and **E. Velazquez**	103	Growth promotion of chickpea and barley by a phosphate solubilizing strain of Mesorhizobium mediterraneum under growth chamber conditions
S. Unni and **K. K. Rao**	111	Protein and lipopolysaccharide profiles of a salt-sensitive *Rhizobium* sp. and its exopolysaccharide-deficient mutant
O. Dilly	117	Microbial respiratory quotient during basal metabolism and after glucose amendment in soils and litter
Short communications		
P. L. Staddon and **A. H. Fitter**	129	The differential vitality of intraradical mycorrhizal structures and its implications
E. C. Berry and **D. Jordan**	133	Temperature and soil moisture content effects on the growth of *Lumbricus terrestris* (Oligochaeta: Lumbricidae) under laboratory conditions

Volume 33 Number 2

K. L. McLean, J. Swaminathan and **A. Stewart**	137	Increasing soil temperature to reduce sclerotial viability of *Sclerotium cepivorum* in New Zealand soils
R. Steinkamp, K. Butterbach-Bahl and **H. Papen**	145	Methane oxidation by soils of an N limited and N fertilized spruce forest in the Black Forest, Germany
C. Fang and **J. B. Moncrieff**	155	The dependence of soil CO_2 efflux on temperature
M. Bacilio-Jiménez, S. Aguilar-Flores, M. V. del Valle, A. Pérez, A. Zepeda and **E. Zenteno**	167	Endophytic bacteria in rice seeds inhibit early colonization of roots by *Azospirillum brasilense*
E. D. Vance and **F. S. Chapin III**	173	Substrate limitations to microbial activity in taiga forest floors
D. A. Lipson, T. K. Raab, S. K. Schmidt and **R. K. Monson**	189	An empirical model of amino acid transformations in an alpine soil

L. A. Ketch, D. Malloch, W. C. Mahaney and **M. A. Huffman** 199 Comparative microbial analysis and clay mineralogy of soils eaten by chimpanzees (*Pan troglodytes schweinfurthii*) in Tanzania

J. Mikola, G. W. Yeates, D. A. Wardle, G. M. Barker and **K. I. Bonner** 205 Response of soil food-web structure to defoliation of different plant species combinations in an experimental grassland community

A. Korsaeth, L. Molstad and **L. R. Bakken** 215 Modelling the competition for nitrogen between plants and microflora as a function of soil heterogeneity

L. E. Twigg and **L. V. Socha** 227 Defluorination of sodium monofluoroacetate by soil microorganisms from central Australia

R. Merckx, K. Brans and **E. Smolders** 235 Decomposition of dissolved organic carbon after soil drying and rewetting as an indicator of metal toxicity in soils

M. Díaz-Raviña and **E. Bååth** 241 Response of soil bacterial communities pre-exposed to different metals and reinoculated in an unpolluted soil

Short communications

L. Elsgaard 249 Ethylene turn-over in soil, litter and sediment

G. J. Griffin, E. P. Smith and **T. J. Robinson** 253 Population patterns of *Aspergillus flavus* group and *A. niger* group in field soils

C. Shang and **H. Tiessen** 259 Sequential versus parallel density fractionation of silt-sized organomineral complexes of tropical soils using metatungstate

Correspondence

R. Agerer, J. Ammirati, P. Blanz, R. Courtecuisse, D. E. Desjardin, W. Gams, N. Hallenberg, R. Halling, D. L. Hawksworth, E. Horak, R. P. Korf, G. M. Mueller, F. Oberwinkler, G. Rambold, R. C. Summerbell, D. Triebel and **R. Watling** 263 Open letter to the scientific community of mycologists. Inputs from referees requested

A. S. Grandy, M. S. Erich and **G. A. Porter** 267 Erratum to "Suitability of the anthrone-sulfuric acid reagent for determining water soluble carbohydrates in soil water extracts" [Soil Biology & Biochemistry 32 (5) 725–727]
